David,

Eric Downing and I have verified the fit of a Sceet 12 with the flange and we don't see a problem using the spun part which P/N is D2156.

Subject: RE: D2156 Vent Flange (Ref. D206-575-011)

Marc,

I don't have a problem with the change as long as the part will function in service. In fact, I believe this is what is meant by Jim's handwritten note, which says "Make from D2000 aspirator". Will the part mate properly with the required hoses if its made to the new dimensions? What is the p/n of the spun part in the photograph?

David

Subject: D2156 Vent Flange (Ref. D206-575-011)
Importance: High

REFERENCE ONLY

David,

I inherited a W/O here for D2156 Vent Flange dated... 11/09/09... We need to ship qty(1) D206-571-011 Heater soon and the part in question is not conforming to the drawing as follows:

1. Drawing specifies a welded assembly, we have a spunned part which requires drilling of holes and the flange has to be cut to shape on drawing;
2. The major ID is Ø2.875" instead of Ø2.750";
3. The height of the sceet connection is 0.970" instead of 1.000".

The reason to have the part spunned is to reduce cost so manufacturing would like to have the drawing revised accordingly as well as authorization to use the non-conforming parts to complete the PO and ship on time.
